DETAILED ACTION

Response to Arguments / Amendments

In light of Applicant's amendments and arguments the rejections of the previous office action are withdrawn.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 28-29, drawn to an apparatus comprising a mail sorting device and a folder device, classified in class 209, subclass 702.
- II. Claims 13-27, drawn to method for creating a delivery point package, classified in class 209, subclass 902.

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, both situations are present. First, the process does not require a mail sorting device having a plurality of partitions and a plurality of compartments as claimed in independent claims 1, 7 and 28. Secondly, the apparatus can be used to practice a materially different process. Specifically, independent method claims 13, 18, 21 and 26 all require invertible folders. The apparatus of claims 1, 7 and 28 does not require inverting of the folders and works just as well without any inverted folders.

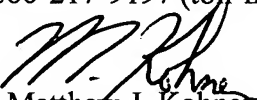

Art Unit: 3653

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
